Client: Tractor Supply Company — Backend Developer (Node.js, TypeScript)

- Designed scalable backend services using Node.js, Express.js, and TypeScript for enterprise content delivery.
- Built a Couchbase caching layer, reducing average response latency by 67% (2083ms → 692ms).
- Implemented event-driven processing via Azure Service Bus, improving background job reliability.
- Resolved production issues including stale cache propagation, race conditions, and sync failures.
- Developed REST APIs for video ingestion, metadata processing, and content lifecycle management.
- Built automated benchmarking utilities for latency, P95, and success-rate reporting.

Client: PepsiCo — Full-Stack Developer (React.js, Node.js, GraphQL, TypeScript)

- Built workflow automation modules using React.js, Node.js, TypeScript, and GraphQL for 200+ users.
- Integrated third-party APIs and automated data sync between external and internal systems.
- Optimized GraphQL queries and payload structures, cutting data transfer by ~30%.
- Built reusable frontend components and improved state management with Redux Toolkit.

Client: Epiroc — Frontend Developer (React.js, TypeScript)

- Built an enterprise service management portal for 100+ daily active internal users.
- Designed reusable UI components and dashboards, boosting dev efficiency by ~30%.
- Integrated REST APIs with optimized client-side state handling for workflow updates.
- Improved frontend performance, cutting initial page load time by ~20%.

Projects

AI Document Assistant *React.js — Node.js — Gemma 4B — Ollama — RAG — PostgreSQL*

- Built a full-stack AI document assistant for natural-language document search.
- Integrated Gemma 4B via Ollama and implemented RAG for grounded responses.
- Designed the data layer with PostgreSQL and blob storage for scalable retrieval.
